

## Project Description

Becher Hoppe provided the construction services for the Wadleigh Street Bridge, B-37-423, over the Plover River in the Village of Hatley. The Plover River is a Class II trout stream making construction more challenging to protect this habitat.

## Project Features

- 60' long two-span flat slab concrete bridge
- Type M tubular steel bridge railing
- Steel piling foundations
- Heavy riprap (using local red granite)
- Asphaltic pavement approaches
- Water and sewer coordination with Village of Hatley
- Pavement marking

## Firm's Involvement

- Agency coordination with WDNR and Army Corp of Engineers
- Utility coordination
- Construction observation and administration
- Coordination with WisDOT and Village of Hatley
