

Project Description

CTH B provides the residents in the Village of Plover and surrounding areas access to one of the area's shopping and business districts. With an increase in pedestrian and vehicle movements in this area of the Village, this project was initiated to improve the intersection layout and traffic signals for safer pedestrian movements. Becher Hoppe was contracted by the Wisconsin Department of Transportation to provide construction engineering services for Project ID 6767-04-72, CTH B & Hoover Avenue Intersection, Village of Plover.

Project Features

- Traffic Signal upgrade to improve pedestrian and vehicle movements
- Installation of new concrete pavement left turn bay on CTH B
- Curb and Gutter
- Storm sewer modifications

Firm's Involvement

- Project coordination with WisDOT, Portage County, and Village of Plover
- Concrete testing
- Aggregate sampling
- Quantity measurement
- Construction pay estimates and contract modifications
- Field Manager data entry
- Weekly updates to WisDOT
- Facilitate preconstruction meetings and weekly construction meetings
