

Project Description

The portion of CTH P (formerly USH 10) between CTH S and CTH N that runs through the Village of Milladore had reached the end of its useful life. Becher Hoppe was contracted by the Wisconsin Department of Transportation to provide design engineering services for a mainline pavement and drainage system. Before USH 10 was rerouted north of Milladore, this road carried significant amounts of traffic through a minor urban area, and had experienced significant drainage issues.

Project Features

- Asphalt mainline reconditioning
- Storm sewer system
- Dual parking/biking lanes
- Contamination remediation within the right of way
- Curb and gutter, sidewalk, and ditching

Firm's Involvement

- Railroad agency coordination
- Stormwater analysis and report
- Construction plans and specifications
- Cost estimate
